PPS/ PAS Grates Over 103mm wide

Please note that any of our grates over 103mm wide (110mm wide o/a with channel included) will look slightly different to advertised.

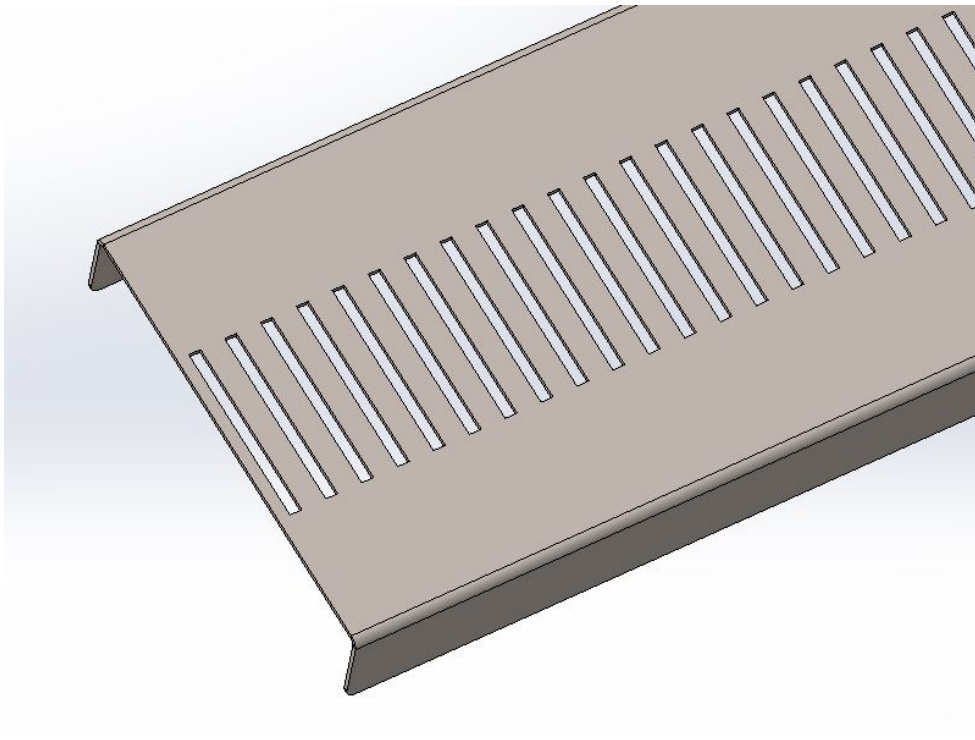

See below 2 options that you have when ordering one of these grate styles over 103mm wide.

Double Punched

With this option, the slots will still reach towards the edge of the grate, however having to punch this grate twice to achieve this width will leave the notches as per the above highlighted red image.

Standard Width Slots

With this option, the slots will not reach the edge of the grate and would leave excess space on each side of the grate as per the above image. This specific image shows how much space would be left on a 200mm wide grate.

[Please contact our customer service team to advise which option you would like to proceed with.](#)
